# GUARD TOUR SYSTEMS

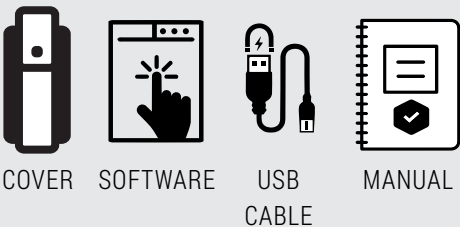

# KV MAX<sup>®</sup>

## Multi-user and multi-company software

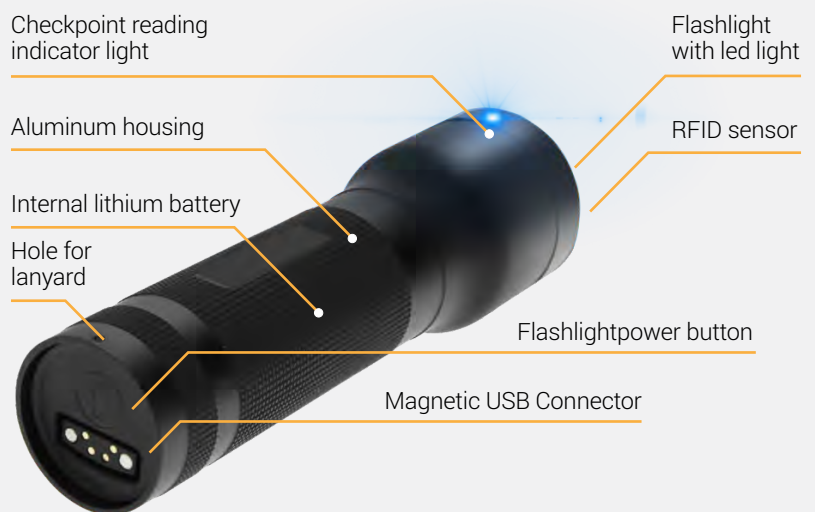

- Easy to install, available for W7, 8 and 10.
- Incident module, email notifications.
- Reports by date, rod or round in Excel format.
- **Impact log:** it records up to 32,000 impacts, from the software you will be able to get a list of the impacts and sabotage attempts that the rod has received and you will be able to identify the person responsible.
- Allows automatic sending of downloaded data by email.
